April 27 Minutes

Sprint Meeting Structure (15–20 mins)

- Structure
  a. Sprint Demo → features
  b. Retrospective → process reflection
  c. Sprint Planning → commitment
- Onsite is preferred but if not possible online is ok also.

Sprint Timeline

- Sprint dates
  - Sprint 1: March 2 – March 15
  - Sprint 2: March 16 – April 5
  - Sprint 3: April 6 – April 17
  - Sprint 4: April 20 – May 3
- Sprint dates are fixed

1. Updates
   Giarno dev updates
   1. bill payment status (paid, overpaid etc)
   2. [[]]
   3. upload proof of payments
      a. sir:
         i. increase the visibility/ size of the bill details (formatting)
         ii. button to view proof of payment, is it necessary or can it be shown agad
            - it might take longer to load for the site
            - sir said oki with the button
   4. renew lease
      a. sir
         i. renew anytime? no requirements for now
         ii. might come up in defense:
            - how will u generate a soa for the previous lease?
            - generate all the soas first
            - how will u be able to access the billing of the old lease?

iii. suggested requirement: they can only renew if everythings paid from the previous lease

2. testing?
    1. jhared: all good, we did deliv 3 also

3. retrospective for sprint 3 (April 6-17)
- what went well
    - tracey:
        - it was mostly dev
    - cheska
        - we [with andy] were able to revise the UCD, descriptions, etc
    - jhared.
        - trello keeping everything organized
        - we didnt have to update on the gc
    - giarno
        - trello was helpful also esp when he has new pulls in dev side
    - andy
        - in general alignment
- what did not go well
    - andy
        - -
    - giarno
        - not sure about business rules in terms of penalty specifics
        - client clarification
    - jhared
        - since he was revising the ERDs, he was looking back in the old files and its confusing
        - we couldve been more organized in the past modules for understanding
        - sir: “archiving”
            - we need to look back across 2 previous semesters and make sure its aligned
    - cheska
        - one big google docs, its hard to go through the tabs
        - hard to make sure everythings aligned in terms of DFDs and use cases
        - even if we talked about it,
        - sir:
            - the software that we’re demonstrating and the final should be aligned
            - the test cases should help with that
            - the UI should help with that also
            - question: UI should be in the deliverable? yes
    - tracey
        - errors since she couldnt pull the code and she wasnt able (at that time) to test/ accomplish as much as she wanted
        - sir
            - other groups brought up that there’s not enough time for them for this since they were handling other requirements and tracey seems to be handling it well
- what will we improve next sprint

        - tracey
            - we have to have a realignment meeting to plan how we are going to be able to finish this by thursday
            - to also know everyones' schedule concerns
            - schedule
                - jhared suggested to find common time for it after this meeting
        - sir's suggestion:
            - can we put the deliverable work/ documentation work in trello
        - peer evaluation for sprint 3
- sprint 4 retrospective is after the defenses
    - covering last monday (april 20) to this sunday

trello

- we dont expect all the documentation to be done, dev work and deliv 3 is expected to be done
- submission can be done today
- signups start thursday, no need to bring handcopy of deliv, hardcopy certification of authorship is whats needed
    - signups are open on saturday, then monday

- if testing doesnt need to be complete,
    - just submit what's meron
    - based on test plan, noting the time constraints, not everything is expected to be done
- non functional requirements
    - add explanation as to why it cannot be done
- defense
    - whats included
        - demo 20 mins
        - 10 mins for presentation
        - 5 mins indiv qna
- qna
    - questions before were mostly based on a gap on the paper
    - now, its harder bc its covers the previous semesters
        - its possible that past topics will be asked
